Explore the CompassOne Modules

One platform. Complete context. Protection you can prove.

CompassOne is your full-stack cybersecurity partner. Integrated modules strengthen security posture and reduce risk with real-time response. Whether you're seeking complete visibility, managing vulnerabilities, or supporting compliance, CompassOne simplifies your stack. Its cybersecurity maturity model helps you measure progress, identify gaps, and follow remediation guidance to improve security at every stage.

Essentials provides ITDR, MDR, or both. Core and Standard offer expanded capabilities, while Standard also adds SIEM capabilities.

		Essentials	Core	Standard
24/7 SOC	Block threats and prevent cyberattacks across endpoints, users, and/or identities.	✓	✓	✓
Security Posture Rating	Benchmark security posture based on NIST scoring and demonstrate ROI.	✓	✓	✓
Asset Inventory	Improve visibility of devices, users, and applications.	✓	✓	✓
Tenant Administrator	Efficiently manage multiple tenants in a single view.	✓	✓	✓
Vulnerability Management	Quickly identify, prioritize, and remediate critical security risks.	✗	✓	✓
Application Control	Block unauthorized and risky applications from being used.	✗	✓	✓
Cloud Posture	Automate and manage your cloud policies.	✗	✓	✓
SIEM	Satisfy compliance requirements with log collection and automated reporting.	✗	✗	✓
Integrations	CompassOne integrates with over 40 technologies.*	◐	◐	✓

**Some integrations have an additional fee per source and availability varies between Essentials, Core, and Standard. For a full list of integrations, visit https://blackpointcyber.com/integrations/.*
