AutoElevate by CyberFOX

Privilege Access Management-- made simple

CyberFOX™

Increasing trends show that malicious actors will target any organization that is vulnerable. No organization is safe--what can you do?

AutoElevate by CyberFOX allows MSPs to remove administrator rights and quickly move to a more secure least privilege model that delivers a seamless customer experience.

Enhance Security

- Remove admin privilege
- Meet security and compliance goals
- Malware protection

Improve Productivity

- Elevate privileges
- Easy rule creation for quick automation
- Manage privileges anytime, anywhere with mobile app

Made For MSPs

- Technician Mode
- Instant ROI
- Zero trust

Principal of Least Privilege

The idea that at any user, program, or process should have only the bare minimum privileges necessary to perform its function. In an IT environment, adhering to the principle of least privilege reduces the risk of attackers gaining access to critical systems or sensitive data by compromising a low-level user account, device, or application.

"Requests that would have taken technicians a long time now just takes minutes."

William Pote- CEO, eTOP Technology, Inc.
