Measure Security Maturity. Prove ROI.

SECURITY POSTURE RATING

CompassOne's Security Posture Rating (SPR) gives you a real-time view of security maturity so you can create prioritized action plans and demonstrate measurable progress over time. SPR translates complex security data into a single, actionable score so you always know where your security stands and exactly what to fix next.

Security Posture Rating

Gain visibility into your cybersecurity maturity and an action plan for improving it.

Benchmark Maturity

NIST-based scoring measures maturity against industry standards.

Prioritize Risks

See what's impacting your score, ranked by priority and risk.

Accelerate Remediation

Step-by-step guidance takes insight to action in one click.

Track Progress

Watch score improve as program matures over time.

Demonstrate Value

Prove ROI, even in the absence of a breach.

Inform Stakeholders

Clear insights for every stakeholder.

> "To be able to see what the security score is and areas that need improvement has really helped us get much more proactive with our security and give peace of mind to our customers.

BENCHMARK. IMPROVE. PROVE.

Know Where You Stand

NIST-based scoring: A single score measures and tracks your maturity across threats, vulnerabilities, user activity, and more.

Multi-dimensional visibility: See your posture broken down by category so you can pinpoint where gaps exist.

Continuous monitoring: Real-time updates give you an always-current view of your security health.

Improve With Actionable Insights

Risk-ranked insights: Know which gaps carry the most risk, so remediation efforts go where they matter most.

Compliance mappings: Findings can be organized by NIST CSF's five functions, making it easy to prioritize improvements and satisfy requirements.

Guided remediation: Actionable guidance provides best practices to address findings and improve your posture.

Prove Security Value With Measurable Outcomes

Month-over-month tracking: View scores over time to provide concrete evidence that your security program is delivering results.

Cyber insurance readiness: A credible, measurable posture score helps meet the increasing security requirements of cyber insurers.

Budget justification: A quantifiable score makes it easier to prioritize investments and build internal support for program growth.

ELIMINATING THREATS WITH AI SPEED AND HUMAN EXPERTISE

1+ BILLION	10+ MILLION	4+ MILLION	2,000+
Total events*	Cloud events*	EDR/AV events*	Disabled accounts for suspicious activity*

*Monthly snapshot of Blackpoint's SOC in action.
