What is Harmony SASE?

Hybrid work and cloud transformation demand security to expand beyond the traditional network perimeter. While companies adapt their enterprise network for the distributed workforce, they must also adapt their network security controls.

Offering a game changing alternative, Harmony SASE delivers 2x faster internet security combined with full mesh Zero Trust Access and optimized SD-WAN performance—all with an emphasis on ease-of-use and streamlined management. Offering a local browsing experience with tighter security and privacy, Harmony SASE boasts innovative on-device network protections and secures any enterprise application with an identity-centric policy that accommodates everyone: employees, contractors and third parties. Its SD-WAN solution unifies industry-leading threat prevention with optimized internet and network connectivity, ensuring uninterrupted web conferencing thanks to seamless link failover and a built-in steering policy for over 10,000 applications.
