

Keepit Backup and Recovery for Miro

From brainstorm to backup: Keep your Miro work safe

Losing Miro boards and settings can halt projects, disrupt teamwork, erase critical IP, delay releases, and force costly recreations. As a vital application for teams to plan, design, and collaborate, it becomes essential to protect it from data loss.

Awarded for its broad SaaS coverage, impenetrable architecture, and ease-of-use, Keepit ensures that your Miro data is backed up and swiftly recoverable at all times, minimizing the impact of data loss and the burden of recovery on your teams.

Time-saving usability

Easy to implement and intuitive, Keepit requires minimal expertise to use — while delivering confidence in your ability to swiftly recover your data whenever you need it.

Confidence in recovery

Have your data always at your fingertips with comprehensive, automated backups and flexible restoring of teams, spaces, boards, and more.

Centralized management

A unified platform for all backups across critical SaaS applications — provides transparency, visibility, and easy reporting for managers and leadership.

THE RISK

In 2024, over 70% of data loss incidents were caused by user mistakes.

KEY CAPABILITIES

Automated backups

Customize and automate backup jobs so your data remains preserved and recoverable whenever you need it.

Instant search and preview

Easily find what you need with Keepit's comprehensive search. Use filters to identify data, and the preview function to review it before restoring.

Outstanding ease-of-use

Built to protect SaaS applications, Keepit is quick to implement and intuitive to use.

Highest security

Stored in our vendor-independent cloud, and immutable by design, Keepit offers industry-leading security, keeping your backups safe.

Data compare

Compare backup snapshots to identify records added, modified, or deleted over time, enabling precise recovery.

Unlimited retention

Customize retention for up to 99 years with no extra costs.

Compliance and reporting

Easily document and prove compliance with backup requirements and data protection efforts.
