timus SASE

ZERO TRUST. ZERO CLICK. ALWAYS ON

Enterprise Level Security without the Complexity

The modern workforce is everywhere. Traditional security no longer works.

- VPNs are clunky, unreliable, and hated by users
- Firewalls protect devices, but not users
- Multiple security tools create gaps

We're SASE Category Leader -Q1'25

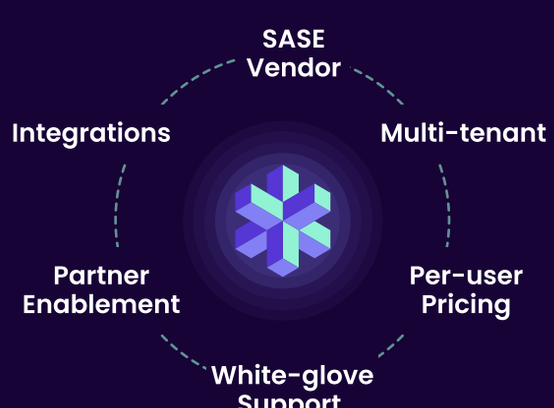

Timus is proud to be named the SASE category leader for 4 quarters in a row by channel program, trusted by MSPs across the industry.

Take Back Control of the Modern Workforce

Timus Networks is the only dedicated SASE/ZTNA vendor built for MSPs - enterprise grade protection, minus the complexity.

Simple. Scalable. Expert-designed.

Zero Click Always-on Security That Works Everywhere

Protect users at home, in the office and everywhere in between — 24/7/365

Our always-on VPN with Zero Trust Network Access (ZTNA) secures every connection, closing gaps from forgotten VPNs.

Everything You Need in One Simple, Scalable Platform

Always-On ZTNA with phish-free browsing
Zero Trust access to data, websites, and apps

24/7 Secure Remote Access for techs, even on public Wi-Fi

Adaptive Cloud Firewall and least privilege controls minimize risk

Fast Deployment
onboard clients in minutes, no hardware needed

Vendor Access Management ensures third parties see only what's necessary

Simplified Compliance with device posture checks and activity tracking

IP-Based SaaS App Access blocks hackers from using stolen credentials

Actionable Reports highlight the value you deliver

The Numbers Don't Lie

Replace old school VPNs, firewalls, DNS filtering and more with one platform that's built to scale.

30 minutes
To Deploy

30%+
Support Ticket Reduction

60%+
TCO Reduction

100%
Network Control

"The fact that you guys go always-on, I turn on my laptop and I'm connected-it's magical and it works."

Charles J. Love

Director of Operations, ShowTech Solutions

Stop Firefighting. Grow Your Business While Protecting Clients.

Bundle Timus SASE into your existing cybersecurity stack to harden your clients' security, increase compliance, and drive recurring revenues - with minimal overhead.

- Replace multiple security tools and save up to 60% in total cost of ownership
- Free up technicians from low-value troubleshooting
- Increase recurring revenue while lowering IT costs
- Meet compliance requirements for HIPAA, SOC 2, FINRA and more with built-in audit trails
- Simple per-user pricing — no hidden fees

Transform your MSP with simple, scalable security that your clients — and techs — will love.
