Auvik Features Overview

Network topology

AUTOMATED NETWORK MAPPING
In minutes, see a complete map of physical and logical topologies.

AUTOMATED INVENTORY
Have a profile for every device on a network at your fingertips. Export the data to a spreadsheet or sync it to your PSA or ITSM.

NETWORK DOCUMENTATION
Instantly know how everything on a network is connected and configured.

IP ADDRESS MANAGEMENT
Get an automatic list of all the IP addresses you're currently using and which devices are using them.

MAP SEARCH & FILTER
Quickly find and visually isolate any part of a managed network.

MAP EXPORT
Print any map view to PDF or SVG for easy sharing or storage.

Remote management

IN-APP TERMINAL
Securely access any Telnet or SSH-enabled device on a network—from anywhere.

REMOTE BROWSER
Log into any device's web interface directly from your Auvik dashboard.

User & credential management

PASSWORD MANAGEMENT
Never again forget device credentials or leave them vulnerable.

TWO-FACTOR AUTHENTICATION
Add an extra layer of security to your Auvik account.

ROLE-BASED USER ACCESS
Set granular permission levels for each of your dashboards.

Proactive network monitoring

ALERTS & NOTIFICATIONS
Stay on top of important network events with preconfigured alerting that works out of the box. Customizable if desired.

SERVICE MONITORING
Inventory and monitor the services running on nearly any device.

CONTEXT-AWARE DATA
Get relevant and actionable information tailored to each device type.

RICH STATISTICS
Understand and improve the stability of the network with usage and health stats.

LIVE & HISTORIC DATA
View network performance as it happens with 60-second polling, or dive into detailed logs.

Troubleshooting

NETWORK EVIDENCE
Instantly know where a device has been seen across a network.

DEBUG DATA
All the technical debugging data you need, pooled in one easy-to-access location.

CONFIGURATION MANAGEMENT
Know exactly how devices are configured and when they change. Never miss a backup.

CONFIGURATION RESTORE
Instantly bring back any configuration from your version history.

CONFIGURATION ANALYSIS
Get suggestions for improving the performance and stability of your networks.

AUVIK TRAFFICINSIGHTS™
Get deep visibility into traffic flows across client networks, including who's on the network, what they're doing, and where their traffic is going.

SYSLOG
View, search, and filter logs directly from your Auvik dashboard to boost your mean time to resolution.
