TruGrid
SecureRDP™

The simplest way to secure access to Remote Desktops & Apps

The freedom to work from anywhere often requires connecting to remote computers, VDIs, and apps.

Built into Windows, Microsoft RDP is one of the most widely - used methods for remote work . As a result , open RDP ports are a rich target for hackers.

TruGrid Secure RDP makes your RDP systems invisible to hackers.

- Implementation in minutes
- No firewall changes or open ports No VPN required
- Built-in MFA (or Azure MFA)
- Built-in Geo Blocking
- Active Directory Password Management
