COMPANY BOILERPLATE

About Island

The Workspace for SMB

Island is the creator of the Workspace for SMB — a single, secure platform built for the way small and mid-sized businesses actually work. By embedding enterprise-grade security, network access, data protection, and productivity tools directly into the familiar browser experience employees already use every day, Island eliminates the need for costly, complex point solutions and gives businesses a simpler, safer way to work.

Island the Workspace for SMB replaces a fragmented stack of tools — including Virtual Desktop Infrastructure (VDI), Virtual Private Networks (VPN), Data Loss Prevention (DLP), web filtering, and password managers — with one unified platform. Employees get a fast, familiar experience on any device, managed or unmanaged, while IT gains complete visibility and control without the overhead of managing multiple vendors and agents.

Headquartered in Dallas, Texas, with research and development in Tel Aviv, Israel, Island is backed by leading venture funds and purpose-built for the security and productivity needs of growing businesses. Island the Workspace for SMB makes enterprise-grade protection accessible, affordable, and easy to deploy — so small and mid-sized businesses can focus on growth, not IT sprawl.

One Platform	Any Device	Minutes	Dallas, TX
Replaces VDI, VPN, DLP, web filtering & password managers	Managed or unmanaged — BYOD ready from day one	Time to deploy for contractors and remote employees	Headquartered in Texas, R&D in Tel Aviv, Israel

Short-form version

Island is the creator of the Workspace for SMB — a single, secure platform that replaces fragmented IT tools with one unified browser-based workspace. Island combines security, network access, data protection, and productivity into an experience employees already know, giving small and mid-sized businesses enterprise-grade protection without the enterprise complexity. Headquartered in Dallas, Texas, Island is backed by leading venture funds and built for the way growing businesses work.
