inforcer

inforcer: where partners go to master Microsoft

For today's MSP, the tenant is the new server, it must be continually monitored, maintained, supported, and secured.

Unlock the full potential of Microsoft's enterprise-grade security and AI technologies with inforcer: purpose-built for MSPs to deliver, secure, and grow modern Microsoft services at scale.

Standardize Microsoft 365 across multiple tenants

With inforcer, managing Microsoft 365 security has never been easier, whether you have 10 or 10,000 tenants.

Save time and resources

Reduce admin and human error by standardizing and automating Microsoft security across multiple tenants. Deploy new tenants in under a minute and improve configuration accuracy.

Connect, learn, and grow

Join our Community to learn directly from Microsoft experts and hear your peers' experiences. Gain access to the insights and training you need to make your Microsoft adoption seamless.

Increase profitability

Cut costs by minimizing reliance on 3rd party security tools. Deliver high-margin Microsoft projects and win larger customers by filling knowledge gaps in internal IT teams.

Retain skilled staff

Improve employee retention by offering clear progression paths and winning back time for engineers to focus on delivering high-impact Microsoft projects.

Products we inforce

- Microsoft Intune
- Microsoft Defender
- Microsoft Entra ID
- Microsoft Purview
- Microsoft Exchange
- Microsoft Teams
- Microsoft 365
- Microsoft Sharepoint

Stay ahead with the latest in compliance, automation, and AI

Security posture management

Automated deployment, back up, and monitoring of Intune, Defender, Entra ID, and more.

User management

Seamless onboarding, offboarding, and lifecycle automation.

Purview and compliance

Simplified data governance and compliance management.

Assessments

Automated security, compliance, and Copilot readiness assessments.

Copilot enablement

Prepare and empower customers for Microsoft Copilot adoption.

Proud founding partner of #IntuneForMSPs

inforcer is one of only two global ISVs selected by Microsoft to launch the #IntuneForMSPs initiative, empowering MSPs to deliver, secure, and optimize Microsoft 365 and Intune at scale.

- Officially recognized by Microsoft as the solution to the multi-tenant management gap.
- Integrated with Microsoft's evolving MSP ecosystem for security, compliance, and AI readiness.
- Direct access to Microsoft experts, training, and community.
- Future-proof your MSP business with Copilot, Purview, and AI enablement.

"inforcer is a key part of our Microsoft security offering. It fills a critical gap in multi-tenant management and security enforcement. We're excited to see how this initiative will accelerate AI adoption and unlock new service models for MSPs like us."
