NordPass®

Comprehensive protection for all company logins

NordPass is an end-to-end encrypted password manager that allows users to securely store, manage, and share company credentials. It also helps enforce strong password policies, monitor user activity, and detect credential-related vulnerabilities across the organization.

> *"It **saves time and allows us to focus on our daily operations.** For any business looking for a way to securely manage passwords in a user-friendly way, NordPass is a necessary tool."*
>

Credential Management and Sharing

Feature	Business plan	Enterprise plan
Autofill and autosave Logins and purchases are fast and easy with autofilled credentials and credit card information. New data is securely saved in the vault with a single click.	✓	✓
Password import Passwords can be imported from other browsers and password managers, consolidating all corporate credentials securely in one place.	✓	✓
Password Generator Unique, complex passwords that meet company policy standards can be generated with a single click.	✓	✓
Email Masking Alias email addresses can be generated to protect user identities from potential cyber threats.	✓	✓
NordPass Authenticator A built-in authenticator provides and autofills time-based one-time passwords (TOTP).	✓	✓
Secure Sharing Credentials and sensitive data can be shared with individual users or groups, with adjustable sharing permissions and time-limited access.	✓	✓
Password History Previous versions of passwords can be reviewed, restored, and tracked for changes.	✓	✓
Offline Mode The vault remains securely accessible without an internet connection, suitable for travel or low-connectivity situations.	✓	✓
xChaCha20-encrypted vault Passwords, passkeys, credit card details, and other sensitive information are stored securely.	✓	✓
Cross-platform compatibility Credentials are synchronized across all devices. NordPass is available as a browser extension for Chrome, Firefox, Opera, Safari, and Edge, and as a mobile app for iOS and Android.	✓	✓
Password Health Employee passwords are monitored to ensure compliance with company-wide policies and to identify vulnerabilities such as weak, outdated, reused, or exposed passwords.	✓	✓
Shared Folders Multiple passwords and sensitive data can be shared within a team using folders with centralized access controls.	✓	✓

Access Control and Identity Protection

Feature	Business plan	Enterprise plan
Biometrics Biometrics can be enabled to simplify logins and add an extra layer of protection to business accounts.	✓	✓
Multi-factor authentication (MFA) Multi-factor authentication can be set up using authenticator applications, security keys, or backup codes to enhance account security.	✓	✓
Recovery of locked accounts Access to user accounts can be restored, enabling data recovery and preventing the loss of corporate credentials.	✓	✓
Single sign-on (SSO) with Google Workspace SSO	✓	✓
Single sign-on (SSO) with Entra ID, MS ADFS, and Okta	✗	✓
User and Group Provisioning with Entra ID and Okta	✗	✓
Network Allowlist Employee access can be restricted to approved IP addresses or countries.	✗	✓

Policy Enforcement and Admin Oversight

Feature	Business plan	Enterprise plan
Business Admin Panel User and group management, account access monitoring, and tracking of key cybersecurity indicators, including credential health, all from one dashboard.	✓	✓
Company-wide settings Autolock settings for public devices and external sharing permissions can be managed efficiently from one dashboard.	✓	✓
Password Policy A centralized password policy can be enforced within the organization to ensure consistent adherence to security standards.	✓	✓
Granular policies Specific security policies can be configured for individual users or roles, allowing tailored control over access permissions, authentication settings, and other rules based on user responsibilities.	✓	✓
Activity Log All user activity within the company is tracked, including credential creation, ownership, and access to shared items.	✓	✓
Group management Groups can be created and managed to grant multiple users the same access permissions and enable secure, immediate credential sharing among members.	✓	✓
Activity Log API Data from the Activity Log can be extracted via the API.	✗	✓
Sharing Hub Access to all shared credentials across the organization can be monitored and controlled, preventing excessive sharing and access sprawl.	✗	✓

Incident Response and Continuity

Feature	Business plan	Enterprise plan
Items Transfer Credentials can be reassigned from departing employees to active team members, ensuring a smooth and secure access transition.	✓	✓
Data Breach Scanner Real-time alerts are provided if company domains, credit card information, or employee credentials are compromised on the dark web.	✓	✓

Integrations

Feature	Business plan	Enterprise plan
Integration with Vanta	✓	✓
Integration with Splunk®	✗	✓
Integration with Microsoft Sentinel	✗	✓

Enterprise Support and Success

Feature	Business plan	Enterprise plan
24/7 expert support Round-the-clock client support from the NordPass team.	✓	✓
Help Center and other resources Access to a self-service knowledge base, featuring in-depth articles, product guides, and tutorial videos.	✓	✓

✓ **Free Premium plan for all users is included**
Provided the company's Business plan is active, each company member can redeem their Premium account (for personal use only) directly from the NordPass vault – no extra steps required.
