ARCHITECTING SUCCESS WITH TIMUS SASE

Up to 90% of US SMBs rely on MSPs for their IT and cybersecurity needs to ensure smooth operations, monitoring, and issue resolution.

When **MSPs** select a vendor for their IT and Security stack they seek solutions that integrate into their operations & existing stack easily and reduce costs. Timus SASE platform includes ten crucial components to meet these needs.

1. Multi-Tenant Capabilities

01

- Manage multiple clients from a single interface.
- Simplifies management, reduces complexity, and scales services.

2. Ease of Use and Deployment

02

- User-friendly interface and simple integration processes.
- Easy to deploy, configure, and manage.

3. Automation Features

03

- Automated updates,threat detection, response and reporting.
- Reduces workload, increases efficiency.

4. Monitoring and Reporting

04

- Always-on, deep visibility into all network activities.
- Helps ensures security and attain compliance.

5. Scalability

05

- Easily scalable via global cloud infrastructure.
- Scales without major infrastructure changes.

6. Competitive Pricing and Licensing

06

- Simple and cost-effective GTM models.
- Month-to-month or annual pricing volume discounts.

7. Strong Support and Training

07

- White-glove support and training materials.
- Highly-enabled staff for solution's management & troubleshooting.

8. Security and Compliance

08

- SOC 2 Type 2 and ISO 27001 compliant.
- Helps MSPs to become and remain compliant.

9. Integration Capabilities

09

- Pre-integrated with tools MSPs regularly use.
- Seamless operations with MSPs' existing technology stack.

10. Tool Compatibility

10

- Built on a layered security approach.
- Can be bundled with other platforms such as EPPs.

Timus SASE: Designed for MSPs

Streamline your operations, scale effortlessly, and stay compliant with ease.
