

Keepit Backup and Recovery for monday.com

Recover lost project and collaboration data instantly — no disruption

Monday.com holds critical project and operational data that, if lost, impacts productivity and performance. Yet, native recovery options are limited to short retention windows. Don't be mistaken: Protecting your data is your responsibility. Accidental deletions, errors, or misuse can permanently erase history, disrupt projects, and create compliance risk.

Awarded for its broad SaaS coverage, impenetrable architecture, and ease-of-use, Keepit ensures that your monday.com data is backed up and swiftly recoverable at all times, minimizing the impact of data loss and the burden of recovery on your teams.

Time-saving usability

Easy to implement and intuitive, Keepit requires minimal expertise to use — while delivering confidence in your ability to swiftly recover your data whenever you need it.

Assured data integrity

With Keepit, you're certain that your backups are immutable — they can't be modified or deleted. Stored in our vendor-independent cloud, your data remains accessible at all times.

Centralized management

A unified platform for all backups across critical SaaS applications — provides transparency, visibility, and easy reporting for managers and leadership.

The risk

In 2024, **over 70%** of data loss incidents were caused by user mistakes.

Source: Proofpoint - The 2024 Data Loss Landscape

Proven benefit

Keepit customers were able to reduce the time needed to restore data for priority users by **90%** after a data loss incident.

Source: Forrester Total Economic Impact Study 2024

"Monday.com is a key SaaS platform in our organization and no backups is a critical gap in our Information Security posture."

April Battenfelder – Managing Director at BEAST
Design Studios GmbH, Germany

Be confident you can always get your data back easily

KEY CAPABILITIES

Automated backups

Customize and automate backup jobs so your data remains preserved and recoverable whenever you need it.

Instant search and preview

Easily find what you need with Keepit's comprehensive search. Use filters to identify data and the preview function to review it before restoring.

Outstanding ease-of-use

Built to protect SaaS applications, Keepit is quick to implement and intuitive to use.

Point-in-time recovery

Restore data to an exact state from any historical point to reverse accidental changes or corruption.

Data compare

Compare backup snapshots to identify records added, modified, or deleted over time, enabling precise recovery.

Highest security

Stored in our vendor-independent cloud and immutable by design, Keepit offers industry-leading security, keeping your backups safe.
