

Gain Support and Expertise to Transform Your Business with AI

Looking for guidance to strengthen your AI skills?

With AI transforming how businesses operate, **now is the time to determine how your MSP will operationalize AI.** Do you have a plan to monetize AI? How can you position your MSP as both an AI thought leader and a trusted advisor who delivers measurable outcomes for your clients with AI?

Elevate your expertise with an AI Community Group.

Whether you need to explore the path to becoming a Managed Intelligence Provider (MIP) or the impact of agents and digital labor on your SMB clients, **AI Community Groups provide a collaborative environment for learning and sharing how AI can elevate success for you and your clients.**

These groups include a mix of sessions for sharing market trends, as well as demos and guest speakers. Group members will also be asked to share their thoughts and insights. The goal is to share and learn with your community.

How do Community Groups Differ from Peer Groups?

Community Groups are virtual only and are larger in size than Peer Groups. The goal is to build a community around a specific topic and focus on helping members build deep subject matter expertise through collaborative learning. Community group members may be in the same geographic area or market.

Join the AI Community Group!

Invitations to join the AI Community Group are open to Pax8 Partners who are engaged with Pax8 Academy Peer Groups, Instructor-Led Training or Coaching.
