Chrome Enterprise Premium & ChromeOS device management

A powerful combination to keep your users and business data secure

Get the full benefit of Google security. Extend the browser protections with Chrome Enterprise Premium down to the operating system (OS) layer with ChromeOS.

chrome enterprise

chromeOS

ChromeOS offers the most secure OS, out of the box thanks to features like a read-only OS that blocks viruses. Combined with ChromeOS device management, you can extend policies and protections at the OS level to keep your business data secure.

Build on your success

Extend the security and policies you already manage through Chrome Browser to the entire device with ChromeOS device management.

Eliminate OS complexity

Stop paying for and patching a complex OS. Manage a simple, browser-centric OS that is read-only, and has never had a reported successful ransomware attack, ever.

Lower Total Cost of Ownership (TCO)

Radically reduce IT workload, support tickets, and hardware costs.

Unlock savings with Chrome Enterprise Premium and ChromeOS device management

Add ChromeOS device management to your existing Chrome Enterprise Premium licenses

chrome enterprise

chromeOS

Your browser-first security solution with Chrome Enterprise Premium:

- **Security Insights with Comprehensive Reporting:** Generate detailed reports to identify potential data loss incidents and risky user behavior
- **Malware and Ransomware Protection:** Proactively scans downloads and flags dangerous files before they can cause harm
- **Offer secure access** to corporate resources based on context aware signals
- **Centralized Extension Management:** Manage browser extensions to prevent malicious add-ons and standardize tools

Advanced security controls with ChromeOS device management:

- **Additional reporting:** On health of device fleet within Admin console, and with integrations with industry leading 3P solutions
- **Extend malware & ransomware protection to device:** Secure your fleet with a read-only OS that has had zero reported ransomware attacks, with features like sandboxing, verified boot, and automatic updates
- **Extended data loss prevention:** Protect data at OS level based on user, data source, and destination
- **Enhanced Device Management:** Disable devices remotely, lock screens, push network configurations and specific settings to entire fleets of devices

DevotedHealth

"By going all-in on ChromeOS, we reduced our total cost of ownership of devices by 44%. We've also seen 24% fewer cyber attack attempts."

Snap Inc.

"Snap consciously chose Chrome Enterprise, ChromeOS, and Workspace to gain a stronger security posture."
