

HacWare

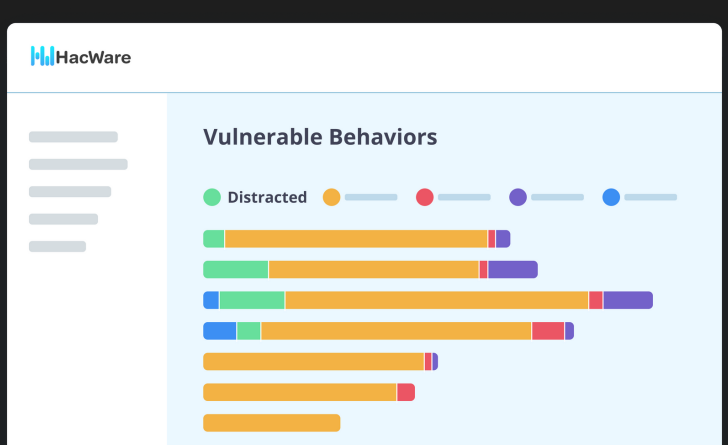

INTELLIGENT AWARENESS ON AUTOPILOT

Simple, Smart, Automated Awareness

hello@hacware.com | www.hacware.com

Over 90% of data breaches are caused by phishing attacks. Email is the preferred tool for social engineering employees. The average employee is vulnerable to spear phishing because they spend 1,500 hours a year using email and are unaware of email security best practices.

HACWARE'S SECURITY AWARENESS TECHNOLOGY COMBINES OPEN-SOURCE DATA AND DATA SCIENCE TO SHOW YOUR USERS HOW TO AVOID SOCIAL ENGINEERING ATTACKS.

INTELLIGENT

HacWare's internal risk assessment provides real-time threat intelligence to show internal vulnerabilities.

HABIT FORMING

The phishing technology leverages behavioral psychology best practices to improve your company's cyber posture.

PERSONALIZED

HacWare learns from the intelligence to provide personalized phishing simulations and training.

WHY HACWARE?

Set & Forget it Phising

The product does not require a technical team to manage phishing and training efforts. Our data driven technology is automated.

Easy Email Integration

The product integrates with cloud-based email like Microsoft 365 and GSuite.

Business Impact Reporting

There is a needs gap between security and leadership about information security. This product makes it easy for everyone to understand why cybersecurity is important.

Did you know? HacWare users are seeing a 60% reduction rate in malware outbreaks every 21 days.
