The simplest, yet smartest backup platform for all your data

Complete protection, instant recovery. That's smart.

Smarter backup and recovery, delivering centralized protection, via an intuitive app, for data residing on infrastructure, cloud-native environments, and an ever-widening array of SaaS apps.

Set up in 60 seconds, with zero hardware required, and infused with AI-powered malware detection, Redstor reduces complexity and management overhead, making it the simplest, safest, and smartest way to protect all your data.

A single app, the broadest coverage.

Back up all your data, regardless of where it resides, using one vendor through a single app or protect individual workloads not currently protected by your existing backup vendors.

Cloud backup and recovery. Only smarter.
Smarter cloud backup, with zero hardware required, delivering the broadest coverage of data sources from a single app and lightning-quick recovery of any files on demand.

Smarter recovery.
The only cloud-first backup with on-demand recovery of files and databases, in an instant. Redstor's proprietary InstantData™ technology enables recovering entire systems in moments, with a seamless user experience that allows users to get back to work almost instantly, streaming what they need, when they need it.

Smarter management.
Smarter backup, including the broadest coverage of data sources, through a single app, able to be set up in under 60 seconds. Save time, hassle and costs with no hardware requirement and the ability to manage everything centrally, from anywhere.

Outsmart cyber threats
Redstor's proprietary, AI-powered, malware detection technology neutralizes threats before they become attacks. Scanning all existing backup data, it isolates, quarantines and flags any suspicious files for review, and thanks to community insights, the solution gets better every day.

Accreditations

Industry quality assurance to give you the highest level of confidence in our own security practices
