pax8ProServices

SentinelOne Deployment Service

SentinelOne is an endpoint protection platform focused on detecting and eliminating security and cyber threats and attacks across networks that are remotely connected with clients' devices. This service offering includes the following components:

Deployment of:

- SentinelOne Agents
- Policy requirements as defined by the Partner or client

Limitations and Requirements

Future SentinelOne maintenance and response will be required and are the responsibility of the Partner or client security or administrative team. Pax8 Professional Services does not provide any ongoing support or incident response for SentinelOne.

Prerequisites

- SentinelOne subscription though Pax8
- All users and endpoints (as necessary) licensed properly with the deployment model
- Active console access:
    - Must have Global or Account permissions for the console
    - Token for the site
- Endpoints of the Agents:
    - Must run a supported operating system and meet other system requirements
        - [Pax8 US | SentinelOne System Requirements](#)
    - Method of agent deployment (GPO, RMM, etc.)
- Confirmation of Exclusions, Policies, Device Settings, Users, and Groups

Configuration Options

Policy Configuration

Policy configuration will vary based on the environment and system being protected.
Global polices can be inherited by deployed sites or customized on an individual basis.
Access "Help" in the SentinelOne portal for assistance with policy options.

Package Deployment Methods

- SentinelOne Endpoint Installer can be deployed in the following ways:
    - Manually per endpoint
    - Group Policy Object
    - RMM utility
    - Intune Deployment
- Pax8 can advise on the above deployment methods, but deployment method selection will ultimately be the responsibility of the Partner or client.

Get Started

To get started, order the Pax8 Professional Services Engagement SKU in the Pax8 Marketplace. Please contact your Pax8 account team with questions.

Eligibility

Open to active Pax8 partners in the U.S. and Canada. SentinelOne subscriptions must be purchased via Pax8. SentinelOne subscriptions purchased elsewhere are not eligible for service. Customer must not fall within our regulatory limits. Customer must not be a federal contractor (or subcontractor) or any type of law enforcement agency/body subject to the CJIS security rule.
