Commvault® Cloud Air Gap Protect

The easy button to the cloud, Commvault Cloud Air Gap Protect delivers secure, air-gapped cloud storage for your data backups. For use with Commvault SaaS hybrid cloud offerings, you'll get streamlined single-vendor management with no need for additional cloud skills and expertise. Simplify your cyber resilience with pre-configured networking and storage, reduced costs via efficient deduplication and no egress fees, and ransomware mitigation with secure air-gapped cloud data protection.

SAVE COSTS AND PROTECT AGAINST RANSOMWARE WITH THE EASY BUTTON TO CLOUD STORAGE

- Straightforward setup and management
- Up to 80% savings* over on-premises storage, with streamlined operations and predictable costs
- Flexible tiers for long- and short-term retention
- Air-gapped ransomware protection that is secure and highly scalable

Storage tiers for short- and long-term retention

Hot and cool storage tiers provide greater flexibility for customers looking for cloud storage options. Customers looking for a primary backup copy repository should use our hot tier, while customers seeking a secondary storage option for longer retention can leverage our cool tier. Both storage tiers may be used together for an end-to-end strategy.

Commvault Cloud Hot Tier Storage

Fit for short-term retention, typically 30 days or less. Reduce reliance on physical infrastructure or enable cloud-to-cloud backups for quick cyber recovery.

Commvault Cloud Cool Tier Storage

Fit for data retention policies of 30 days or longer. Send secondary copies of your backups to secure cloud storage for an agile, modern alternative to tape.

- Cost-optimized cloud data mobility
- Predictable costs and lower TCO
- Simple configuration of cloud storage for backups
- Storage tiers for short- or long-term retention needs
- Single-pane-of-glass management
- Default compliance lock

AIR GAP PROTECT AND HYPERSCALE X

Air Gap Protect lets Commvault customers seamlessly adopt cloud storage for Backup and Recovery or HyperScale X—with just a few clicks. Flexible primary and secondary backup options allow any combination of hot and cool tiers to replace or augment on-premises backup storage.

*Based on cool tier storage use case; with hot tier storage delivering savings of up to 35%
