usecure | uBreach Pro

Unlock sales growth and enhance client security

Proactively protect clients from stolen credentials, differentiate your service, and affirm your stance as a forward-thinking MSP.

Elevate client security

Ensure your clients are always one step ahead of dark web threats.

Win new customers

Unlock a powerful sales tool that helps you sell your security services.

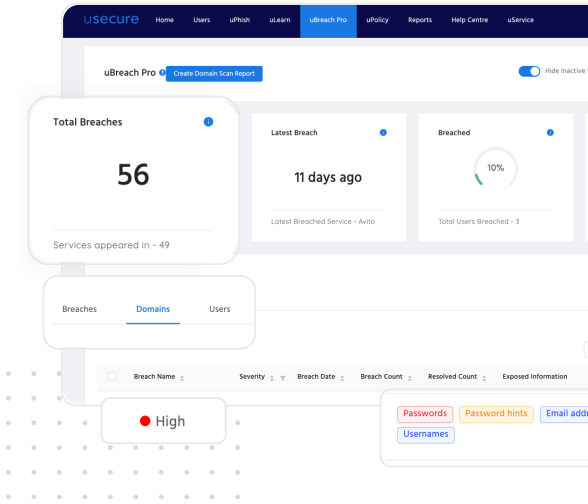

Enhance service value

Boost service value with a unique offering that instantly delivers value.

The leading dark web monitoring and breach prospecting tool for MSPs

It's no secret that many dark web monitoring services exhibit a glaring flaw: they either fall short in maintaining up-to-date breach coverage, struggle with user-friendliness, or fail to genuinely cater to MSPs.

uBreach Pro is the first advanced dark web intelligence service that is truly fit for MSPs, combining a proactive solution for eliminating dark web threats with usecure's award-winning partner program.

uBreach **leads the way** in dark web monitoring

Rated as a Leader on G2 and Channel Program.

Prospect new clients with actionable breach reports

Run free domain scans for prospects and demonstrate the need for your service.

Widen your detection with domain-level monitoring

Monitor all emails under a given domain to assess company-wide breaches.

Protect clients in real-time with instant breach alerts

Detect threats as soon as they appear and mitigate risks before they escalate.

Monitor extensive, up-to-date breach intelligence

Broaden your scope by monitoring a greater number of data breach sources.

uBreach Pro | Core Features

Powerful sales prospecting. **Extensive** breach coverage. **Proactive** client protection.

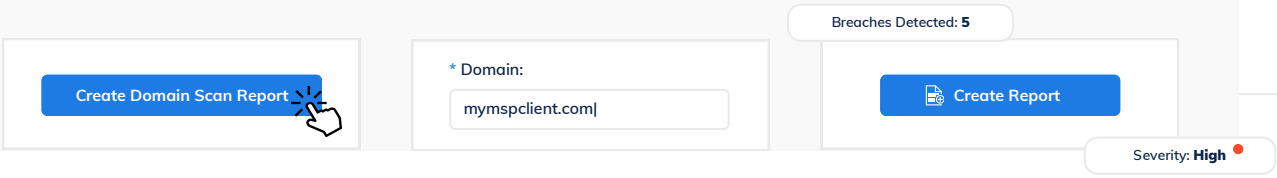

Prospect

Highlight the urgent need for your service by generating free breach scan reports for sales prospects.

- Run free domain scans for prospects in a few quick and easy steps
- Show breach data and partial passwords for up to 5 email addresses
- Generate an easy-to-digest breach PDF report, branded by your MSP
- Access ready-made marketing assets to drive client interest and leads

Generate free domain scan reports in a few simple steps

1. Select ‘**Create Domain Scan Report**’ in uBreach.
2. Add the client’s company name and domain.
3. Generate a branded PDF breach report.

Protect

Monitor a significantly broader range of breach sources and accurately pinpoint exposed data.

- Monitor a significantly larger database of data breach sources
- View exposed data (e.g. passwords) in securely redacted values
- Monitor all email accounts under client domain(s) (domain-level monitoring)
- Understand the severity of new breaches with contextual overviews

Prevent

Keep clients one step ahead of dark web threats with proactive alerts and ‘resolved’ breach tags.

- Configure instant breach email alerts for admins, clients and end-users
- Gain clearer insights with a revamped UI and data breach summary reports
- Reduce your clients’ risk scores by marking breaches as ‘resolved’
