Elevate Email Security with Next-Gen SIEM and Adaptive AI

Comprehensive Threat Defense with IRONSCALES and CrowdStrike

Challenges

- **Evolving Phishing Attacks:** Modern phishing techniques, such as business email compromise (BEC) and account takeover (ATO), bypass traditional security controls.
- **Fragmented Security Ecosystems:** Disparate tools create inefficiencies, complicating detection, correlation, and response.
- **Operational Strain:** Security teams spend excessive time addressing false positives and investigating threats.

Solution

The IRONSCALES Cloud Email Security Platform integrates with CrowdStrike Falcon® Next-Gen SIEM, delivering a unified defense against advanced phishing and ATO threats. By ingesting IRONSCALES email security telemetry into Falcon Next-Gen SIEM, security teams gain enhanced visibility, cross-domain correlation, and faster detection of phishing threats.

IRONSCALES proactively detects and mitigates evasive phishing attacks—including BEC, ATO, and VIP impersonation—that bypass perimeter defenses and native cloud-based email security. By combining AI-driven detection with insights from 25,000+ global security analysts, IRONSCALES protects where it matters most—inside your users' inboxes.

Key Benefits

- Enhance your threat intelligence by combining insights from the Falcon platform and IRONSCALES global network of 25,000+ analysts.
- Improve security operations by centralizing email security telemetry for faster detection and response.
- Extend visibility of Indicators of Compromise (IoCs) to include sophisticated email-basedattacks within Falcon Next-Gen SIEM.

Key Capabilities

Comprehensive Threat Visibility

- Ingest real-time phishing and ATO threat intelligence from IRONSCALES into Falcon Next-Gen SIEM.
- Gain a single-pane-of-glass view of email-based threats alongside endpoint, identity, and cloud security telemetry.

Automated Incident Enrichment

- Access detailed phishing forensic data from IRONSCALES within Falcon Next-Gen SIEM.
- Investigate email headers, sender reputation, payload analysis, and user-reported phishing incidents—all without switching platforms.

Advanced Threat Correlation

- Leverage Falcon Next-Gen SIEM analytics to link phishing activity with endpoint behavior, identity anomalies, and adversary tactics.
- Quickly identify compromised accounts, credential harvesting attempts, and lateral movement indicators.

Remediation within the IRONSCALES Platform

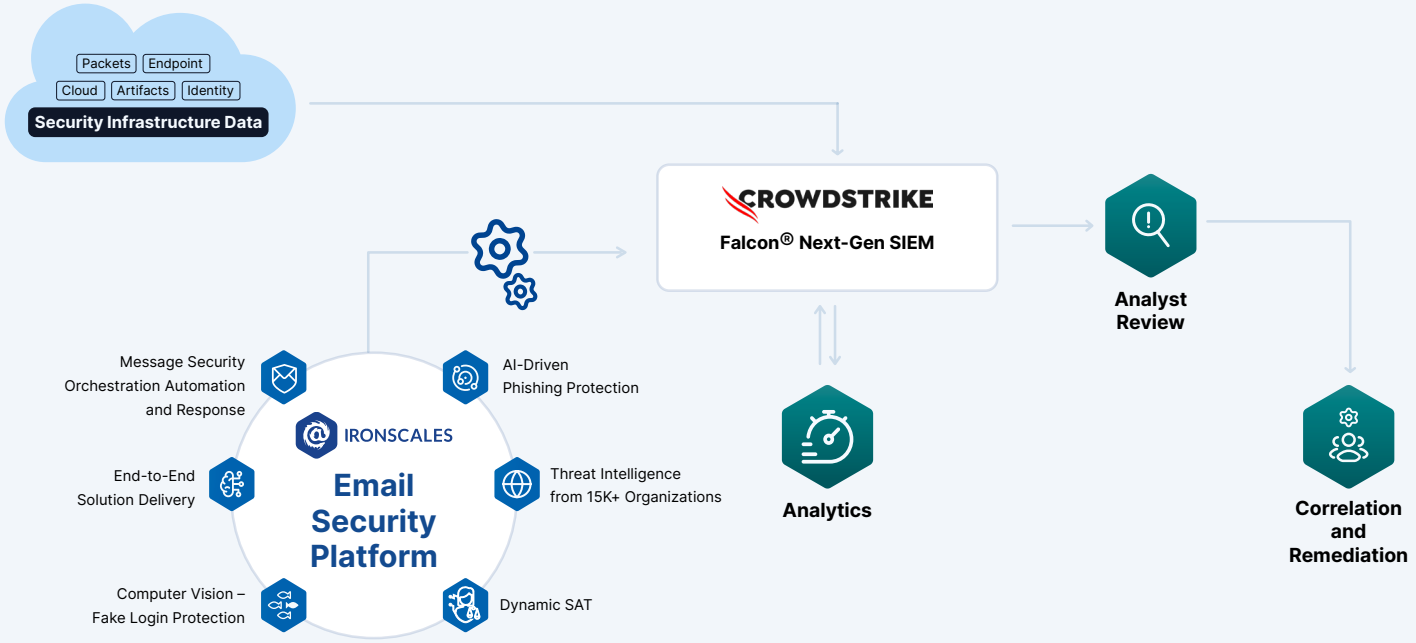

- IRONSCALES automates phishing remediation, proactively removing malicious emails across affected inboxes.
- Security teams can initiate additional response actions such as isolating endpoints or enforcing identity protections within the IRONSCALES platform.

Technical Solution

The IRONSCALES Cloud Email Security Platform integrates with Falcon Next-Gen SIEM, ingesting email security telemetry for enhanced visibility and detection. Security teams can correlate IRONSCALES email security data with endpoint, identity, and threat intelligence within Falcon Next-Gen SIEM, providing a centralized view of phishing and ATO threats.

While the integration is focused on data ingestion, IRONSCALES Cloud Email Security itself provides automated remediation, allowing security teams to respond to phishing threats in real time within the IRONSCALES platform.

IRONSCALES + CrowdStrike Integration

About CrowdStrike

CrowdStrike (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk — endpoints and cloud workloads, identity and data.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

About Ironscales

IRONSCALES is the leader in AI-powered email security protecting over 15,000 global organizations from advanced phishing threats. As the pioneer of adaptive AI, we detect and remediate attacks like business email compromise (BEC), account takeovers (ATO), and zero-days that other solutions miss. By combining the power of AI and continuous human insights, we safeguard inboxes, unburden IT teams, and turn employees into a vital part of cyber defense across enterprises and managed service providers. IRONSCALES is headquartered in Atlanta, Georgia. To learn more, visit **www.ironscales.com** or follow us on X **@IRONSCALES**.
