

PARTNER SALES ENABLEMENT

Platform Quick Guide

What is Pillr?

Pillr is a cybersecurity operations platform built to meet the demands of service providers.

The platform is staffed by 85+ certified security analysts and threat hunters stationed across 5 SOC2 Type 2 compliant SOC's.

Pillr SOC teams operate 24/7/365 to evaluate customers' security, investigate events, and provide remediation guidance.

The platform supports 450+ integrations, with a commitment to develop integration with any service or tool.

Why choose Pillr?

Pillr allows you to provide a powerful security operations solution backed by 5 global SOC teams—all at an accessible cost.

Some cyber insurance and regulatory requirements for data protection require 24/7/365 security support.

With Pillr, your team can reduce breach detection timing from 200+ days to hours.

Year over year, the risk of cyber threats is increasing—Pillr is designed to adapt, so you can prepare customers for what's ahead.

Ideal customer profile

Small-to-medium businesses for whom building, maintaining, and staffing a SOC would be cost prohibitive.

Organizations requiring 24/7/365 security monitoring and reporting—potentially to meet cyber insurance or regulatory requirements.

Those with strict service commitments to business operations and/or customer data.

Organizations seeking compliance with the CIS framework and/or FTC, HIPAA, PCI, and PII standards.

KEY DIFFERENTIATORS

Capabilities

35+ threat intelligence feeds

Web-based SIEM with log search functionality
