DNSFilter

DUAL ANYCAST NETWORK FOR RELIABILITY & SPEED

- **2 Million** queries resolved per second
- **5 billion** unwanted content filtered daily
- DNS Queries from **195 countries**

SMARTER FILTERING. FASTER PROTECTION. DEPLOY IN MINUTES.

The modern internet is full of evolving threats and distractions—but most security solutions are slow, complex, or costly. DNSFilter is a fast, AI-powered filtering solution that blocks threats 10 days sooner than traditional feeds and controls content access with precision—wherever your users are.

- Stop malware, phishing, and unwanted content before they cause harm
- Deploy in minutes—no hardware, no headaches
- Protect users everywhere, on any device

40,000+ organizations trust DNSFilter to deliver a safer, faster, and more manageable internet experience without the high costs or complexity of traditional filtering solutions like firewalls and endpoint agents.

THE DNSFILTER DIFFERENCE

AI-POWERED FILTERING
Detects zero-day threats up to 10 days earlier than third-party threat feeds

GLOBAL COVERAGE
Processes DNS queries from 195 countries worldwide

FLEXIBLE DEPLOYMENT
Network or roaming clients—fast, simple setup in minutes

EFFORTLESS MANAGEMENT
Integrates with existing security tools and RMMs

DNSFILTER MAKES A BIG IMPACT

5 BILLION
Unwanted content filtered daily

200 MILLION
Threats blocked daily

170 BILLION+
DNS queries daily

40 THOUSAND
organizations trust DNSFilter

DNSFilter

WHY ORGANIZATIONS CHOOSE DNSFILTER

QUICK, LOW-OVERHEAD DEPLOYMENT

- Up and running in minutes—no hardware required
- Cloud-based protection with minimal IT effort

"The initial setup only took 30 minutes... No hardware to maintain."
— IT Director, K-8 school

BRAND PROTECTION ON GUEST & PUBLIC WI-FI

- Prevent inappropriate content from being accessed on public networks
- Ensure brand safety in hospitality, retail, and education settings

"We had a hardware device for filtering Wi-Fi for years...Not having to worry about hardware anymore is a plus."
— Erik Peterson, Director of Technology, Bethany Baptist Church

HYBRID WORKFORCE & REMOTE COVERAGE

- Consistent content filtering and security beyond the corporate firewall
- Protect remote workers, students, and mobile users without a VPN

"The roaming [client] can be installed on laptops and protect them wherever they are."
— Owner, Civic & Social Organization

PHISHING & MALWARE THREATS

- Blocks phishing, ransomware, and cryptojacking at the DNS layer
- Stops malware from calling home, preventing infections from spreading

"If malware does bypass our endpoint security, it cannot 'phone home.' DNSFilter stops it."
— Dan MacGregor, IT Manager

REDUCE COSTS & COMPLEXITY

- Replace costly appliances or bloated security suites
- A simpler, more effective alternative to Cisco Umbrella & NGFW filtering

"We used Cisco Umbrella for many years and the cost always seemed steep, and the interface was not very friendly... DNSFilter solved those issues."
— Steve Williams, Mid-Market

COMPLIANCE & REGULATORY WINS

- Helps meet CIPA (K-12), HIPAA (healthcare), PCI-DSS (finance), and ISO 27001 requirements
- Helps organizations pass audits and demonstrate security controls

"We're ISO 27001 certified—this was an easy win for risk reduction."
— Alastair Jones, VP TechOps
