

Copilot Readiness Assessment

The Copilot Readiness Assessment supports partners by assessing a customer's Microsoft 365 tenant in preparation for the adoption of Copilot for Microsoft 365. The Copilot Readiness Assessment is available as a standalone offering and is also a prerequisite to the Pax8 Copilot Adoption.

This Service Offering Includes the Following Components:

- A review of Data Governance within the target Microsoft 365 tenant.
- Microsoft 365 Application utilisation review
- Data Storage and use of SaaS applications

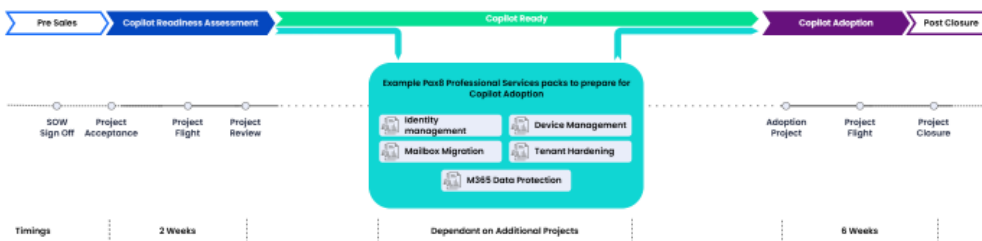

This Service is for Partners who Need:

The Copilot Readiness Assessment Pack is designed for organizations that want to begin adoption of AI tools in the workforce responsibly, by taking tenant security seriously and enabling users to achieve the most benefit from these new systems, helping the organization extract the most value from Copilot for Microsoft 365 with the following:

- **Reduced Risk:** adopting AI without good data governance is bad and could result in exposure of data.
- **Increased Impact:** ensuring apps are well used, existing adoption of M365, ensures that the organisation is ready to adopt additional services
- **Adoption Roadmap:** Badly planned IT projects fail. Structure around how the customer will adopt Copilot, ensuring better ROI and success of the additional services that Copilot will enable.
