

What is Azure?

With more than 200 products and cloud services, the Azure cloud platform is designed to help you bring new solutions to life. Build, run and manage applications across multiple clouds, on-premises and at the edge, with the tools and frameworks of your choice, so you can unleash new business growth efficiently and securely.

Trust your cloud

Security from the ground up. Backed by a team of experts and proactive compliance trusted by enterprises, governments and start-ups, Azure can reduce costs and complexity with a highly secure cloud foundation managed by Microsoft.

Operate hybrid

Azure meets you where you are. Integrate and manage your existing on-premises, multicloud and edge environments by leveraging Azure's seamless, more secure services designed for hybrid.

Be future-ready

Continuous innovation from Microsoft supports your development today – and your product visions for tomorrow.

Benefits for Microsoft partners

- Fewer than 8% of Microsoft partners transact all Microsoft clouds, yet they're responsible for over 60% of annual revenue.¹
- Selling Azure solutions alongside Modern Workplace and Dynamics leads to an increased opportunity for managed services.²
- 50% of SMBs (small to medium-sized businesses) have increased their spending on managed services since COVID-19.³
- Partners transacting all Microsoft clouds average 2,500% more billing revenue per year than partners transacting just one cloud.⁴

Benefits for your clients

- Seamless integrations with Microsoft 365.
- Increased productivity, agility and customer value over traditional infrastructure solutions.
- Reduced total cost of ownership when compared with traditional infrastructure solutions.
