Commvault® Cloud: Backup and Recovery for Salesforce

Safeguard your production and sandbox data

Commvault Cloud, powered by Metallic AI, delivers powerful, enterprise-grade data protection. With broad-ranging coverage across the Salesforce Cloud, Commvault keeps valuable data safe from deletion, corruption, and malicious attack. Whether granularly restoring records, seeding and populating sandbox environments, or protecting multiple production orgs, Commvault keeps data secure and recoverable—without the complexity.

CYBER RESILIENCE FOR SALESFORCE DATA

- Reduce downtime, prevent data loss, and rapidly recover from attack
- Maintain production and sandbox environments from a single interface
- Leverage advanced, hardened, and enterprise-grade security controls

Hassle-free protection

Robust protection for valuable Salesforce data, including content, files, custom objects, profiles, metadata, hierarchal relationships, seed data, and more. Effortlessly restore data at scale—or seed and manage sandboxes to accelerate development and testing.

- Preserve orgs, users, configurations, and settings
- Automate and perform high frequency backups
- Search, preview, and compare data sets
- Quickly restore data with version-level, and in-place recovery controls
- Seed, mask, and retain sandbox environments with ease

Award-winning SaaS

With Commvault Cloud, you get proven data protection, without the hassle. Harness the power of simplified deployments, built-in simple deployments, built-in maintenance, and automatic updates. SaaS that's proven to reduce costs without sacrificing security or performance.

- Unlimited cloud storage with unlimited retention built-in
- Bring your own AWS storage options
- No hardware, installation, or large upfront capital investments
- Zero egress fees or hidden storage charges
- Streamlined management with ultimate user scalability

Multi-layered security

Hardened data security and cyber recovery for Salesforce commercial and government Clouds. With stringent security standards, privacy protocols, zero-trust access controls, and advanced AI built-in, Commvault Cloud minimizes risk and mitigates emerging data lost threats.

- Isolated, air-gapped backups from source data
- Layered security plus GDPR compliance
- Advanced automation, AI, and threat intelligence
- Role-based, SSO, SAML authentication controls
- FedRAMP® High Authorized, SOC2, and ISO 27001
