

Intelligent Content Platform

Maximize value of your data while minimizing risk with a unified, AI-powered solution

Digital Content is Your Most Valuable But Risk Exposed Asset

Like most organizations, your data is expanding even faster than your business. Statista predicts a global data explosion of 175 Zettabytes in 2024. Contributing to that number, your employees collaborate daily creating and collaborating on a multitude of emails, spreadsheets, documents, and presentations. Data is the lifeblood of your business, driving your business workflows and innovation. However, because of the sensitive information these files contain, it's also the riskiest part of your business.

Meanwhile, your IT team is overloaded with permissions management, compliance requirements, alerts, system maintenance and backups and can hardly keep up with current business, much less future IT projects. As your data grows, it becomes harder to manage, employees can't find important files when they need them, and files are often lost or worse, exposed to users who shouldn't have access to them.

Egnyte Can Fix It

Egnyte provides a business-class file repository that will:

- Reduce costs
- Improve the user experience
- Enhance security
- Reduce risk

The Egnyte cloud-based platform can replace local Windows File Servers with a virtual mapped drive for users. Your users can continue to use either Microsoft 365 or Google tools to collaborate on files, but with feature enhancements like fast previews and AI-driven search tools.

Meanwhile, Egnyte provides encrypted file security, scalable access permissions, and AI analysis of events to detect suspicious behavior and locate sensitive data to protect. Built-in virus detection and snapshot recovery are critical safeguards from ransomware attacks.

Best of all, Egnyte can connect and scan your existing repositories including Microsoft SharePoint, OneDrive, Google Drive, Dropbox, Exchange Online, Gmail, and many others. Egnyte, in addition, offers integrations with Salesforce and hundreds of other applications.

Egnyte protects and manages content while making you more productive.

Built-in Intelligence for Intelligent Collaboration

- AI finds sensitive information in all files and emails across all repositories so you can protect it- not just Egnyte
- Activate hundreds of pre-built sensitive information patterns with a single click to help your organization comply with privacy and regulatory requirements
- AI driven document queries find answers to questions within your documents
- File Lifecycle management can automate your Retention, Archival, and Deletion policies by sensitive content type.
- Advanced search, sharing and collaboration tools streamline user productivity.
- AI-driven behavior detection alerts you of suspicious events and connects to your cybersecurity solutions.

Egnyte Meets You Where You Are

Whether you need a secure cloud-based document repository for your users, or simply want to scan and monitor existing repositories, Egnyte can help with:

AI-driven detection

- Choose from a variety of built-in sensitive data detection patterns like government IDs and personal account numbers that align with the regulations applicable to your industry.
- AI detection utilizes contextual cues to determine whether data within your files is sensitive.
- Using Optical Character Recognition (OCR) the platform detects sensitive information in images.

Advanced Integrations

- A multitude of integrations with popular business applications like Salesforce.com, Microsoft SharePoint, Microsoft Teams, and Google Workspace.
- Published APIs, Metadata and other integrations with SIEM, DLP, and CASB security solutions.
- Industry-specific integrations are available with products such as Procore and Autodesk.

AI Assistance

- Users can use the embedded AI to ask questions about documents.
- AI driven search locates information embedded in documents and videos.
- AI driven analysis can respond to inquiries based on your documents.

Flexible Workflows

- Access to integrated desktop, browser and mobile applications support workers who are on the move.
- Edit files online using your preferred applications, whether it's Microsoft or Google.
- Benefit from built-in review and approval workflows, as well as pre-installed Projects and File and folder templates.

Egnyte Supports Your Industry

Egnyte has vertical integrations and solutions for various industries

- AEC: Object detection and geo-location of On-site photos, Procore and Autodesk integrations
- Defense Contractors: Egnyte is FedRAMP-ready at a Moderate impact level, and provides CMMC 2.0 configuration and assessment support
- Financial: Ultra-Secure Document Rooms for Mergers & Acquisitions (M&A), and capital fundraising
- Life Sciences: GxP Compliance and workflows

Egnyte combines the power of cloud content management, data security, and AI into one intelligent content platform. More than 22,000 customers trust Egnyte to improve employee productivity, automate business processes, and safeguard critical data, in addition to offering specialized content intelligence and automation solutions across industries, including architecture, engineering, and construction (AEC), life sciences, and financial services.
