NinjaOne Backup for Google Workspace

ninjaOne

Data Protection for your Google Workspace Tools

Many companies believe that Google Workspace tools are enough for protecting their data. Although they are popular productivity tools, Google doesn't provide much protection at all. Google deletes end-user Drive files and emails after 30 days in the trash folder and Workspace only allows admins 25 days to restore items.

NinjaOne's SaaS Backup solution delivers the simplicity and flexibility to back up your business-critical Google Workspace data in the cloud, giving you more protection and control for the tools your teams use most.

Key Features

Google Workspace Tool Protection
Ensure protection of your digital file repository and business-critical data with backups for My Drive, Gmail, Shared Drive, Contacts, Calendars, and Tasks.

Ransomware Recovery
Defend your or your client's data with backups that are secured with military-grade encryption and are automatically backed up multiple times a day.

Secure Restore Options
Utilize enhanced granularity to find and restore a single email, a mailbox, or the entire email ecosystem.

Built-In Automation
Ensure your data is protected in a way that best fits your business with customizable automation schedules to back up your key Google Workspace tools.

Unlimited storage and optimized restores
Save on storage costs with unlimited space and use incremental backups that only search for and back up changed files for quicker restores.

Consolidated Dashboard
Use the Google Workspace data backup dashboard to manage backups and user access, monitor backup plans, initiate restores, and more.

The NinjaOne Difference

Fast to learn, simple to use.
The cloud-native NinjaOne platform is built from the ground up by our team, optimized for power and ease of use.

#1-rated free support.
Our top-rated Support team is there when you need them, earning them an average 98% satisfaction rating year over year.

Management of ALL your devices.
See, monitor, and manage Windows, macOS, Linux, SNMP, virtual, and cloud devices from one console.

Unlimited, free on-boarding and training.
We'll help get you up and productive in days, not months, and training is always there for your team.

Automation from day one.
Patch automation is part of every device setup and hundreds of out-of-box automation scripts are ready to use and save you time.

Constant innovation.
Frequent releases that include features requested by our customers ensures NinjaOne continues to meet your needs.

Fast navigation.
For MSPs, every second counts, so the NinjaOne platform is optimized for speed and efficiency.

- Group Settings
- Organizational Units

Chats (COMING SOON)

- 1:1 messages
- Group messages

What our customers are saying

G2 ★★★★★ GetApp ★★★★★ Software Advice. ★★★★★ Capterra ★★★★★

"NinjaOne's backup policies give us a ton of control over what we backup, what we exclude, how much bandwidth we use, and how long we keep data which helps us balance our data protection needs with storage costs."

Chris Porosky
CEO, Red Roads Network

"We use NinjaOne Backup to ensure critical servers and workstations are protected and easily recoverable. Having NinjaOne Backup being built from the ground up and fully integrated into the Ninja platform is a huge benefit."

Jesse Vella
Staff Supervisor, In-Shore Technologies
