Effortlessly Safeguard Sensitive Data. Everywhere.

Dynamic Data Security Platform for MSPs

Don’t Leave Your Cybersecurity Stack Incomplete, Lock Down the Crown Jewels, and Reduce the Data & Compliance Risk Impact by Over 90%.

The weakest link to your customer’s sensitive data is likely the lack of visibility.
Adding more traditional Cybersecurity locks and fences at the perimeter, such as Firewalls, Endpoint Detection and Response (EDR), and DLP is not enough.

By leveraging Actifile’s game-changing Data Security Platform, you can quickly identify and protect sensitive files across the organization where your traditional Cybersecurity stack falls short.

Monitor Sensitive Data on One Centralized Platform

- Ensure compliance with data and privacy standards and regulations.
- Minimize data breach risks, whether from ransomware or insider threats.
- Offer crucial forensic evidence post a breach.

Managed Data Security Platform for MSPs

Enabling MSPs to Enter the Data Security Market

Actifile transforms how Data Security & Risk Management is offered by MSPs to their clients, creating new revenue streams with an elevated security offering.

Our built for MSPs, simple-to-onboard and use platform allows our partners to illustrate the monetary value of current Data Risks alongside the MSP's existing cyber security approach, and deliver unmatched protection against potential financial loss.

How MSPs Unlock Growth with Actifile?

Competitive Advantage
Separate yourself from the competition with a unique value proposition and demonstrated results. On average our partners reduce financial risk for their customers by over 90%!

Avoid Financial Implications
Data breaches often result in significant financial losses for the MSP and their clients. Avoid the cost of managing a breach, including investigating the incident, notifying affected parties, providing credit monitoring services, and potential legal action.

Support the Legal and Regulatory Compliance Effort
Help clients become and remain compliant with relevant laws in all regulated industries. Non-compliance with these regulations can lead to substantial fines and legal consequences.

Apply Proactive Risk Mitigation
Identify vulnerabilities and potential risks before they are exploited by malicious actors. Proactive measures, such as regular security assessments, vulnerability management, and security training, can significantly reduce the chance of successful attacks.

Build Your Brand, Client Trust, and Reputation
Enhance your reputation as you build your portfolio, grow your brand and make a rapid ascent towards MSSP status.

Managed Data Security Platform for MSPs

Enabling MSPs to Enter the Data Security Market

Actifile transforms how Data Security & Risk Management is offered by MSPs to their clients creating new revenue streams with an elevated security offering.

Our built for MSPs, simple-to-onboard and use platform allows our partners to illustrate the monetary value of current Data Risks alongside the MSP's existing cyber security approach, and deliver unmatched protection against potential financial loss.

By doing so, we transform safeguarding the client's 'Crown Jewels' – the sensitive data - to a heightened level while continually demonstrating increased value to the market.

Go Beyond Traditional Cybersecurity:

Enter the Managed Data Security Segment with Actifile's Dynamic Encryption

The weakest link to your customer's sensitive data is likely the lack of visibility.
Adding more traditional Cybersecurity locks and fences at the perimeter, such as Firewalls, Endpoint Detection and Response (EDR), and DLP is not enough.

By leveraging Actifile's game-changing Data Security Platform, you can quickly identify and protect sensitive files across the organization where your traditional Cybersecurity stack falls short.

Actifile's Data Security Platform was built to monitor all of the sensitive data via one centralized platform so you can:

- Ensure compliance with data and privacy standards and regulations.
- Minimize data breach risks, whether from ransomware or insider threats.
- Offer crucial forensic evidence post a breach.

How it Works?

Actifile reduces monetary risk through real-time data assessment, monitoring and protection of sensitive data files:

- Our Assessment and Continuous Monitoring identifies the at-risk sensitive data and controls who can access these high-value assets.
- Quantifies potential financial implications and aligns with privacy laws and regulations.
- Alerts on data usage anomalies in real-time.
- Fortifies against external (like ransomware) and internal threats with preemptive file-level encryption and supplies post-breach forensic evidence.

How MSPs Unlock Growth with Actifile?

Competitive Advantage
Separate yourself from the competition with a unique value proposition and demonstrated results. On average our partners reduce financial risk for their customers by over 90%!

Avoid Financial Implications
Data breaches often result in significant financial losses for the MSP and their clients. Avoid the cost of managing a breach, including investigating the incident, notifying affected parties, providing credit monitoring services, and potential legal action.

Support the Legal and Regulatory Compliance Effort

Effortlessly Safeguard Sensitive Data. Everywhere.

Dynamic Next-Gen Data Security Platform

Don’t Leave Your Cybersecurity Stack Incomplete, Lock Down the Crown Jewels, and Reduce the Data & Compliance Risk Impact by Over 90%.

The weakest link to your sensitive data is likely the lack of visibility.
Adding more traditional Cybersecurity locks and fences at the perimeter, such as Firewalls, Endpoint Detection and Response (EDR), and DLP is not enough.
By leveraging Actifile’s game-changing Data Security Platform, you can quickly identify and protect your sensitive files across the organization where your traditional Cybersecurity stack falls short.

Monitor Sensitive Data on One Centralized Platform

- Ensure compliance with data and privacy standards and regulations.
- Minimize data breach risks, whether from ransomware or insider threats.
- Offer crucial forensic evidence post a breach.

| THE MISSING ELEMENT IN EVERY CYBERSECURITY STACK |

Changing the Cybersecurity Paradigm

No Cybersecurity stack is complete if it merely hides the organization's crown jewels (sensitive data) behind increasingly higher fences with bigger locks (e.g. Firewalls and EDRs). Actifile Dynamic Data Security allows organizations to re-imagine their Cybersecurity and dramatically reduce risk.

STEP 1

DISCOVER AND CLASSIFY SENSITIVE DATA

The Actifile AI Autonomous Sentry continuously scans the environment to identify all data files

STEP 2

QUANTIFY THE RISK

Automatically assigns monetary risk values to all data

STEP 3

MONITOR THE FLOW OF DATA

Continuously tracks and reports on all sensitive data (movement, access, changes etc.)

STEP 4

DYNAMICALLY ENCRYPT ALL IDENTIFIED DATA

Automatically protects (encrypts or blocks) Sensitive Data based on dynamic, scalable rules – reducing monetary risk by +90%

A Quantum Leap in Data Security

- Reduces monetary risk by +90% within hours (10% risk reduction has been the gold standard for legacy solutions)
- Is simple to deploy and manage
- Utilizes transparent encryption, eliminating the impact on employee productivity
- Compliance standards can be achieved within hours instead of months
