THREATMATE™

Unified Attack Surface Management Built for MSPs

Less Tools. More Margin.

"Threatmate stands out as the **"Swiss Army Knife"** of Threat Testing."

Gustavo.
Tritek

ThreatMate is a powerful, reliable solution backed by a **team that truly cares**. Highly recommend!

Built for MSPs

Fit seamlessly into MSP operations and multi-tenant environments.

Multi-tenancy
Manage multiple clients from a single pane of glass, with inherited settings and flexible overrides.

PSA Integrations
Push findings directly into service boards and workflows.

Role based access control
Manage access by technician, client, or role .

APIs
Automate common tasks and integrate with existing MSP tools

Internal and External Attack Surface

Reduce risk across assets by validating vulnerabilities, testing real exploits, and securing domains against spoofing.

Asset Discovery
Identify devices and services across client environments.

Vulnerability Scanning
Detect weaknesses in endpoints, servers, and public-facing systems.

Automated Pentesting
Validate which internal and external risks are truly exploitable.

DMARC & SPF validation
Prevent spoofing and phishing by securing client domains.

Active Directory Security Assessment
Identify weak configurations and risks in AD environments.

Endpoint Compliance
Verify disk encryption, antivirus, firewall, Secure Boot, and more

---

Cloud and User Security

Strengthen account security, harden cloud configurations, and keep watch for exposure.

Dark Web Monitoring
Detect compromised credentials and prioritize high-risks.

MFA adoption & coverage reporting
Track coverage and identify users without strong authentication.

M365 Security Baselines (CISA)
Measure tenant security against government standards.

Permissions & Misconfigurations
Highlight excessive rights and risky configurations.

Reporting & Compliance

Deliver proof that clients, auditors, and teams can trust.

Executive Summaries
Business-level views for decision makers.

Technical Drilldowns
Detailed reports for your techs will love.

Audit-Ready, Modular Reports
Build evidence packages aligned to frameworks.
