PRODUCT TOUR

RoboShadow

CYBER MANAGEMENT PLATFORM

# What Cyber Responsibilities Does RoboShadow Cover?

The following overview aims to provide a quick guide to managing cyber security – **not just for technical people**, but business leaders as well. This 'product tour' demonstrates just how RoboShadow helps to manage a modern cyber security capability for almost any organisation. We estimate that around **75% of corporate cyber security responsibilities** are covered by RoboShadow. The 180 different integrations across Antivirus, PSA, and Cloud Authentication delivers a truly integrated security strategy. Many users report that RoboShadow is **"a massive time saver platform"** - everything we build, and design is around saving the administration time, reducing the communication sprawl, false positives, automating fixes and automating the healing processes for MSPs, SMBs, enterprise and anyone with an attack surface they want to protect!
