Meet the Tenant Migration Bundle!

Microsoft 365 tenant migrations are complex. Licensing shouldn't be.

The new Tenant Migration Bundle supports the migration of all workloads in a tenant-to-tenant scenario: Exchange, OneDrive, SharePoint, Teams, and Outlook configuration. With this bundle, it's never been easier to scope and plan for a move to a different tenant. There are two key parts to the bundle:

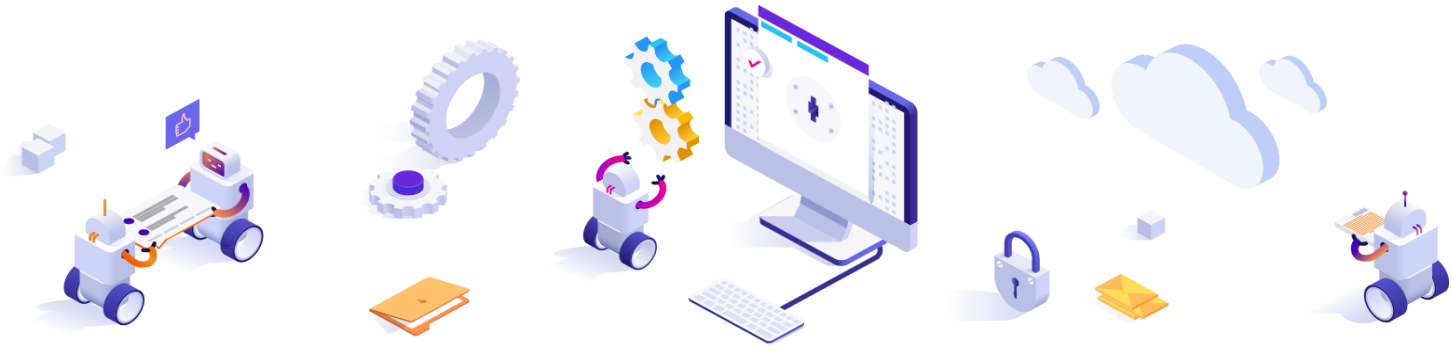

User Migration Bundle

Our popular multi-workload license for user mailboxes and files – with no data limit.

Flexible Collaboration License

A new versatile license to migrate either Teams or SharePoint Online data – up to 100 GB per license.

The Tenant Migration bundle is a single per-user bundle for all workloads. **For every four users in the project, we will provide one Flexible Collaboration License to be used for a Teams or SharePoint migration.** And with a Tenant Migration Assessment in Voleer, you'll have a comprehensive report of the source environment to properly scope and plan the move.

WHY MIGRATIONWIZ?

All Workloads. One Solution.

Stop using different tools for each workload in your project. With MigrationWiz you get a single powerful engine for mailbox, file, and even collaboration migrations.

Trusted By Partners Worldwide.

For nearly two decades, MigrationWiz has helped thousands of businesses around the world move to or between cloud office suites. Don't take our word for it: read real customer feedback via Gartner Peer Insights.
