DATA SHEET

Collaborative Email Security for Google Workspace

HORNETSECURITY vade

The scalability, cost savings, and standardization offered by Google Workspace (GWS) have made it hugely popular with businesses of all sizes. Its popularity with cybercriminals, however, is creating enormous challenges. From dynamic phishing emails to evasive malware, email is the #1 entryway to GWS. SMBs need a solution that provides multi-layered protection.

Vade for Google Workspace is an integrated, low-touch email security solution for GWS that is powered by AI and enhanced by people. Featuring a powerful AI engine that continuously learns from an alliance of human and machine intelligence, Vade for Google Workspace blocks today's and tomorrow's most advanced threats.

BENEFITS

- Inline solution that analyzes email instantly before delivery.
- Provides additional protection layers that catch more threats than Google alone.
- Improved, more accurate graymail filtering and classification.
- Automatically removes newly identified threats post-delivery.
- Simplified, user-friendly interface.
- Easy to deploy and manage.
- Flexible licensing options aligned to your business.

FORTIFY GOOGLE WORKSPACE

Leveraging Vade's powerful engine, Vade for Google Workspace features a combination of behavioral AI models that block sophisticated threats and automate investigation and response. The solution fortifies GWS's native security and fills the gaps with advanced features, while also offering an easy-to-use interface that is less complex than Google's.

Anti-Phishing

Vade for Google Workspace features Machine Learning and Computer Vision models trained to recognize malicious behaviors, including: obfuscated URLs, time-bombed URLs, email spoofing, URL redirections, remotely hosted images, and manipulated images and brand logos.

Anti-Spear Phishing and BEC*

Natural Language Processing and sender spoofing algorithms analyze elements of an email that reveal anomalies and suspicious patterns, including spoofed email addresses and domains, forged display names, anomalous email traffic, and suspicious textual content.

*If spear phishing is suspected, Vade displays a customizable warning banner.

Anti-Malware and Ransomware

Going beyond signature-based analysis, Vade's malware and ransomware detection technologies feature behavioral and heuristic analysis, including analysis of emails, webpages, and attachments; real-time attachment parsing, and hosted-file analysis (Google Drive, OneDrive, SharePoint, WeTransfer).

AI-powered threat detection

- Machine Learning
- Deep Learning
- Computer Vision
- Natural Language Processing

M-SOAR

- Auto-remediation
- SIEM/EDR/XDR integration*
- Email/attachment download*
  Forensic file inspection*
- Customizable spear phishing warning banners

Collaborative Email Security for Google Workspace

ROBUST FEATURES FOR MULTI-LAYERED SECURITY

Powered by AI, enhanced by users

Auto-Remediate

Continuously scans email after delivery and automatically removes messages from users' inboxes when new threats are detected. Admins can also manually remediate messages with one click.

Threat Intel & Investigation

Investigate and remediate user reported emails, deconstruct files, download emails and attachments, and inject live logs into any SIEM/EDR/XDR.*

Vade Remote Browser Isolation (RBI)

Provides complete protection against zero-day attacks that originate from email and take place via browser.*

Integrated Feedback Loop

Transforms admin and end user feedback into vital threat intelligence that is used to continually strengthen the filter and the efficiency of Auto-Remediate.

*Paid Add-On

About Hornetsecurity Group

Vade is proud to be a part of the Hornetsecurity Group. Hornetsecurity is a leading global provider of next-generation cloud-based security, compliance, backup, and security awareness solutions that help companies and organizations of all sizes around the world. Its flagship product, 365 Total Protection, is the most comprehensive cloud security solution for Microsoft 365 on the market. Driven by innovation and cybersecurity excellence, Hornetsecurity is building a safer digital future and sustainable security cultures with its award-winning portfolio. Hornetsecurity operates in more than 120 countries through its international distribution network of 12,000+ channel partners and MSPs. Its premium services are used by more than 75,000 customers.
