Competitive Matrix

At CYRISMA, our goal is to bring affordability, accessibility and simplicity to cybersecurity. The CYRISMA Risk Management Platform has an intuitive, easy-to-use interface, with multi-tenancy built in for MSPs, MSSPs and enterprises. All features and capabilities are shipped out of the box, with no add-ons to purchase separately and no hidden costs. With enhanced visibility into your own and your customers' attack surface, actionable recommendations to close security gaps, data protection and patching ability, you start seeing results almost as soon as the platform is deployed in your environment.
