Commvault® Cloud: Backup and Recovery for Active Directory

Protect AD from data loss threats

Microsoft Active Directory and Azure Active Directory (now Entra ID) are central to providing secure authentication for your business, and ensuring its recoverability is critical. Commvault Cloud, powered by Metallic® AI, allows you to safeguard critical AD data in the face of corruption, accidental deletion, or malicious attack. View what's changed in your environment and revert those changes as efficiently as possible, to rapidly get your business back online.

PROVEN SECURITY AND RECOVERABILITY

- Single-solution protection of hybrid Microsoft AD and Entra ID environments
- Safeguard your Active Directory by protecting critical objects including GPOs, users, groups, and all their relationships
- Ensure roles, conditional access, policies, and more can be rapidly restored storage options
- Get layered security with encryption and air-gapped ransomware protection

Consistent backups for peace of mind
Leave complex backup scripts behind with purpose-built data protection. Ensure frequent backups to be able to roll back AD and undo damaging and unwanted changes in the face of accidental deletion, data theft, cybersecurity threats, or other emergencies.

Fast, granular recovery
Flexible, granular recovery allows administrators to quickly recover only the missing, damaged, or misconfigured object attributes, and get your business systems or users back online quickly without the need for a full restore of an entire Active Directory environment.

Easy to manage
Protect Active Directory in hybrid environments with a single enterprise-grade solution for use with on-premises or cloud applications like Microsoft Office 365 and Microsoft Dynamics 365. Simple SaaS delivery means no-hassle deployment, no backup infrastructure to manage, and automatic updates.

Fast performance for quick recovery	SaaS delivery for simplified management
Single user interface to safeguard the business	Reduce risks of business productivity downtime

SUPPORTED PLATFORMS AND APPLICATIONS

Active directory

Microsoft Active Directory	• On physical or virtual servers, on-premises or in the cloud
Microsoft Entra ID	

Storage targets

Cloud storage	• Included for Entra ID
On-premises storage	(BYO for Microsoft Active Directory) • Commvault Distributed Storage • Dell EMC Isilon, Data Domain • Hitachi HNAS, VSP, HCP • HPE Primera, Nimble, 3PAR • NetApp E-Series • Pure Storage FlashArray
