

The Cyber Risk Platform That Unifies Your Cyber Ecosystem

Clarity to run more efficient operations, strengthen security, and validate the financial protection you already provide.

Run More Efficiently

One intelligent view of your cyber ecosystem so teams stop chasing noise and focus on what matters. Eliminate blind spots, reduce manual effort, and respond faster with clarity.

Strengthen Security

See what individual tools miss. Vantage unifies data from Heimdal and 100+ integrations so you can uncover vulnerabilities, find missing controls, and understand real risk posture across every client.

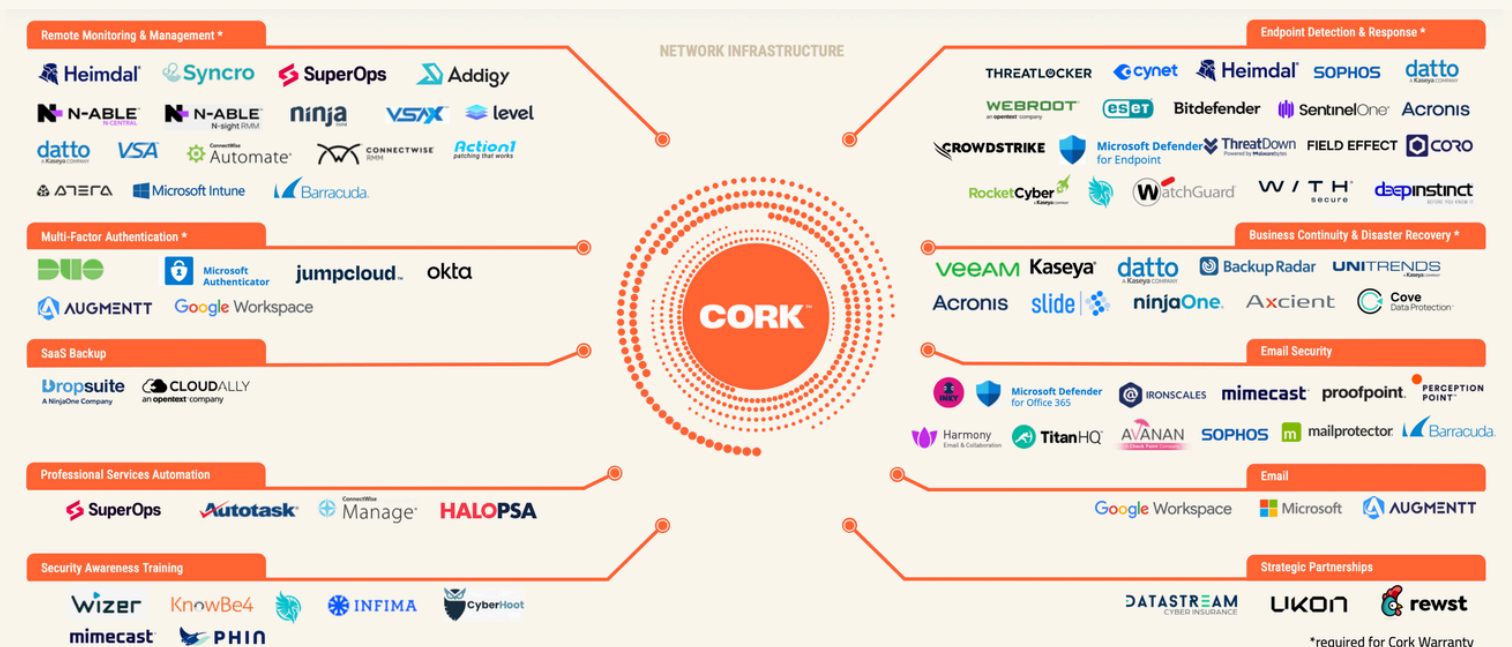

Validate Financial Protection

Cork Vantage validates the risk posture behind the Cork financial protection. Show clients proof, not assumptions, with verified posture tied directly to protection that pays.

Your Cyber Ecosystem, Unified

With 100+ integrations, Vantage brings your risk signals into a single, intelligent view so you can see risk clearly and turn complex data into validated insights that support financial protection.

See which endpoints are covered, which ones are missing required controls, where vulnerabilities exist, and how risk posture is trending across your client base.

Uncover Hidden Risks

Spot vulnerabilities, misconfigurations and blind spots across every client.

Prioritize What Matters

Intelligent prioritization shows what needs attention first — not what makes noise.

Prove Protection

Turn visibility into trust with verified, current risk posture that supports Cork's Financial Protection.

What Our Partners Say

“Cork Vantage's visibility helped us uncover hidden risks, spot inefficiencies, and strengthen our entire operation. The clarity Vantage delivers gives us real confidence in the protection we provide to clients.”

- Craig Bell, ONIT
