New feature

Trend Micro™ Worry-Free™

Advanced Email Protection with Inline Trend Micro™ Cloud App Security

Your customer is at risk of a security breach. Discover, assess, and mitigate risk and defend against complex cyberattacks before it hits their inbox.

Advanced visibility and email protection

1. **Inline mode retrieves email from the mail transfer agent (MTA). This enables Worry-Free to scan and take action on the email before passing it to Microsoft 365 or Gmail.**
2. **When email is sent outbound, Worry-Free intercepts, scans, and takes action before delivering to the recipient.**

Need Managed Support?

Let us help you bridge cybersecurity skill and knowledge gaps

- **Detection:** 24/7 critical alerting and monitoring, and IoC sweeping
- **Investigation**: Incident investigation, root-cause analysis
- **Investigation:** Cross-customer analysis for your customer base
- **Response:** Recommendations or authorized actions, incident response plan, and monthly reports

Get started with XDR NFR (not-for-resale) at no cost

It's as easy as 1-2-3:

1. Log into your Licensing Management Platform
2. Create new Service Plan. Select "Worry-Free XDR" and label this plan "Internal Keys"
3. Check box "Assign as NFR." (This will allow you to deploy up to five licenses for free. You will never be charged for these licenses and will never have to renew)

Benefits

Leverage advanced inbound and outbound protection for both known and emerging email threats

- Scans emails before they arrive in Microsoft 365 or Gmail
- Safeguards critical data with advanced threat prevention (ATP) and data loss prevention (DLP)
- Automated action on suspicious and known email threats
- Customized DLP policies on outbound emails

Prevents

- Malicious Software
- Targeted Attacks
- Malware
- Compromised Email
- Phishing
- Spam
- Email Fraud
- Malicious URLs

We do the hard work; you get peace of mind
