usecure

Human risk management, built for MSPs

usecure helps **thousands of MSPs** analyze, reduce, and monitor their clients' human cyber risk through admin-lite automation.

Key features - all four modules are included in the basic usecure SKU

uLearn

Identify each user's cyber security knowledge gaps and automate ongoing risk-adapted training programs.

uPhish

Automate periodic phishing simulations straight from a ready-made library, or build custom simulations with ease.

uBreach

Safeguard exposed user accounts and stop early-stage threats by monitoring the dark web for stolen credentials.

uPolicy

Keep users well-versed on security standards and simplify audits by storing policies and approvals in one place.

Flexible, Automated, and Built for MSPs

Automation & Multi-Tenancy

- **Seamless Integration:** M365/GWS integration for easy user import and daily sync.
- **Automated SAT:** Auto enrollment into training courses for effortless implementation.
- **Phishing Campaign Automation:** Realistic simulations delivered via Message Injection.
- **Dark Web Monitoring:** Automatic scans to safeguard exposed accounts.
- **Policy Management:** Create/upload policies and automate their delivery for simplified compliance.

Customized Programs

- **Personalized Training:** Tailored training programs based on initial gap analysis results.
- **Engaging Content:** Short training videos with interactive quizzes (10 questions) to maintain user engagement.
- **Customizable Content:** Build bespoke training courses and phishing templates.
- **Adaptable Scheduling:** Adjust the frequency of training and phishing campaigns as needed.
- **Regional Support:** Set trainings / phishing templates to specific languages and regions.
- **Automated Reporting:** Generate client reports to track progress and insights effortlessly.
