- Enterprise-grade encryption and security built-in

Call2Teams using an existing PBX

PBX

Private Branch Exchange (PBX)
A business phone system. It may either be on a customer premises or provided as-a service from a Cloud provider.

Also called a Unified Communications (UC) platform.

Call2Teams (PBX)

The magic that routes calls between Microsoft Teams and your phone system/PBX.

Regular Desk Phone and/or Teams Client

With the existing PBX in-place, users can also keep their favourite desk phone as well as voice-calling via a Microsoft Teams Client.

Simply connect your phone service to Office 365

Keep everything the same

Call2Teams means you can keep your service provider, phone numbers and call bundles.

No hardware or software required

Call2Teams is a true multi-tenant cloud service, simply use it on a per-user subscription basis.

Enterprise-grade and fully integrated

Built for resilience and high availability, the Call2Teams platform is designed with business-in-mind, and is distributed across multiple global data centres, with a service organization to match.
