

# Microsoft and CYRISMA Data Assessment

---

## Funded data assessment to get customers AI-ready

Data governance issues are among the top blockers to AI adoption, especially among SMBs. Through this exclusive funded partnership with Microsoft and CYRISMA, you can prepare customers with the data discovery they need to adopt Copilot for Microsoft 365 securely.

This will allow you to take advantage of an assessment that would normally cost an average of \$1,000 per environment.

A recent study revealed that

1/3

of executives think that less than half of their data is consumable.<sup>1</sup>

## What is this offer?

This funded CYRISMA assessment is an exclusive offer designed for Pax8 to provide our partners with a snapshot of the sensitive data that may not be properly secure across their customers' Microsoft cloud environments. This would include assessing OneDrive, SharePoint, and Teams environments for data such as sensitive financial details and other personally identifiable information.

## What do you get as a takeaway?

As a category leader for vulnerability assessment and management, CYRISMA will empower you to have conversations with your customers about their data estate and implement better access controls prior to rolling out Copilot for Microsoft 365. You will be provided with reports for remediation and executive summaries that help enhance your AI adoption strategy with measurable governance feedback.

You'll also receive a report that includes key resources from Pax8 Professional Services to have effective conversations with your customers about adopting Copilot for Microsoft 365.

## How to get started

Provide your information and your customers' information in the [form](#). This form includes a scope of work for the performance of the CYRISMA assessment and should be completed by an authorized partner representative. Once you've filled it out, our Professional Services team will reach out within five business days regarding the next steps.

This form must be completed separately for each customer for a maximum of five customers per partner. See *additional terms and conditions*.

## What Pax8 needs to complete this assessment

This assessment will require one hour from a technical representative who can give a member of the Pax8 team global admin access to the customer's tenant.

The Pax8 engineer assigned to this project will request administrative credentials via an encrypted email.

**Partner agrees to provide prerequisites within five business days of being contacted.** If the partner fails to provide prerequisites, Pax8 may terminate this SOW at its sole and absolute discretion.

## How long will it take to receive the final output?

Upon receipt of all prerequisites, Pax8 will complete the CYRISMA data assessment within ten business days. The assessment delivery time will vary based on the amount of content in the customer's tenant.

## Terms and conditions

In order to qualify for this assessment, your account must have a minimum of **five** purchased (or committed) Copilot for Microsoft 365 licenses at the time of registration (either internally or across your customer base) purchased via Pax8.

Offer is valid while supplies last.

## What is CYRISMA?

[CYRISMA](#) is a cybersecurity platform that assists organizations in identifying, managing, and securing their sensitive data across various environments. It provides tools for data discovery, classification, and risk assessment, helping businesses address data governance issues and enhance their cybersecurity posture to ensure they are AI-ready. CYRISMA addresses the identity access and data governance pillars of AI readiness in the [Pax8 and Microsoft AI Readiness Playbook](#).
