Commvault® Cloud: Backup and Recovery for Endpoints

Safeguard your remote workforce and data at the edge

Commvault Cloud, powered by Metallic AI, delivers proven data security and cyber recoverability for your remote workforce—all with the simplicity of SaaS. Ensures employee laptop and desktop data is protected, compliant, and recoverable from today's emerging data loss threats.

SECURE LAPTOP AND DESKTOP DATA

- Centrally deploy, manage, and protect endpoint data
- Rapidly recover from deletion or malicious attack
- Reduce your IT burden with user self-service restore options

Reduced risk

A system's only as strong as its most vulnerable laptop or desktop. Commvault Cloud keeps valuable endpoint data resilient and recoverable for user deletion, corruption, or ransomware attack.

- Automated, silent backups without impacting user productivity
- Secure erase, geo-location, and remote wipe functions
- Granular search, point-in-time, and cross-OS restore options
- eDiscovery capabilities like compliance search and export
- Self-service user search and recovery capabilities

Enterprise-grade security

Secure your workforce, wherever it may be. With stringent security standards, privacy protocols, and zero-trust access controls built-in, Commvault Cloud provides enterprise-grade security with advanced artificial intelligence baked in, to minimize threats and mitigate loss.

- AI-powered anomaly and ransomware detection
- Air-gapped and immutable data backup copies
- At-rest and in-flight data encryption
- Role-based, SSO, SAML authentication controls
- SOC2, ISO 27001, and GDPR compliant

No compromise SaaS

Get cost-effective data security without the complexity. Metallic means frictionless deployments, remote management, and hassle-free maintenance. SaaS that's industry-proven to reduce costs and eliminate headaches—without compromise.

- Unlimited cloud storage and one year of retention included
- No hardware, installation, or large upfront capital investments
- Zero egress fees or hidden storage charges
- Automatic updates and maintenance built-in

SUPPORTED PLATFORMS AND APPLICATIONS

Applications

Linux	• Fedora release 29 to current • Debian 9.x to current • SLES 11.x to 15.x • RHEL/CentOS 7.x and 8.x • Ubuntu 8.04 to 18.10 • MacOS Sierra to MacOS Mojav
Windows	• Windows clients – Windows 7 to Windows 10

Storage

Storage	• Unlimited storage included with one year of retention • Extended retention options also available
