

Big security for small businesses

Unpacking the Pax8 MSSP Defend Plus bundle

The ultimate security bundle for SMBs

As a small business looking for ways to better manage your security, your solution needs to:

Work effectively

Be easy to use

Have no false positives

With CrowdStrike, a premier security product vendor, now exclusively available in the Pax8 Cloud Commerce Marketplace, you can get all of these benefits.

Renowned for protecting large businesses against persistent adversarial threats, CrowdStrike is extending its industry-leading technology to empower SMBs with its Pax8 MSSP Defend Plus bundle. Through the Pax8 and CrowdStrike partnership, MSSP Defend Plus will give SMBs access to enterprise-level security featuring five key products. .

The ultimate security bundle for SMBs

What's in the MSSP Defend Plus bundle?

Individually, each of the five components serves as an exceptional standalone offering. But collectively, they form an impenetrable mesh solution that covers every facet of your business and delivers a level of security never before available to SMBs.

NGAV

Falcon Prevent provides best-in-class prevention by blocking brand new malware, exploits and advanced malware-free attacks by using ML (Machine Learning) and AI (Artificial Intelligence), alongside a behavioural approach that analyses indicators of attack.

EDR

Falcon Insight enables advanced endpoint detection and response (EDR) capabilities by providing deep visibility into metadata generated by the endpoint.

Data retention

Falcon Threat Graph, the EDR module of the platform, generates a significant amount of metadata. Instead of storing this data on the endpoints or on an on-prem server, it's stored in the cloud platform where you have access to all the activity across your environment's endpoint.

Device control

Falcon Device Control ensures the safe use of USB devices across your organization. By combining extensive visibility into the devices used across your organisation and granular control, admins can ensure only approved devices are used.

Data collection

Falcon Data Replicator provides the ability to import/export data collected by the Falcon platform from all the sensors installed across all managed endpoints in near real-time.

The ultimate security bundle for SMBs

Security made easy

As an SMB, you already have a lot on your plate running your day-to-day business. So, get started now with the MSSP Defend Plus bundle and reap the benefits of enterprise-level security that's as easy to use as it is powerful.

- Easy to deploy
- Easy to manage
- Easy time-to-value

If you want security made simple, you'll want to plug in to the MSSP Defend Plus bundle.

Level up more than your security

Implementing MSSP Defend Plus can also help do more for SMBs, helping you grow your business, gain efficiencies and reduce risk.

You can **grow your business** by delivering industry-leading EDR and NGAV with MSSP Defend Plus, giving you an enterprise-grade solution within an SMB budget.

You'll **gain efficiencies** with the lowest false positive rate in the industry, helping SMBs save time and avoid alert fatigue, which results in less revenue and more hours invested.

And you'll **reduce risk** with a solution trusted by over half of the Fortune 500, helping SMBs supersize security by minimising incidents that can result in customer churn and financial and legal liability.

Why Pax8 and CrowdStrike?

As the CrowdStrike and Pax8 partnership grows, so will this solution – becoming even more robust over time. Only with MSSP Defend Plus. And only from CrowdStrike and Pax8.

Why Pax8 is your partner of choice
