

Foxit Connectors | Get Connected

Automate your document workflows by integrating Foxit eSign with 40+ business apps. No code required.

Overview

Foxit Connectors allow teams to automate eSignature workflows across the platforms they already use. With over 40 available integrations—including Workday, ADP, BambooHR, SharePoint, Google Drive, and Box—users can trigger actions, route documents, and store files automatically without switching platforms or writing code.

Whether you're in HR, finance, legal, or operations, Foxit Connectors simplify complex workflows and maintain compliance with enterprise-grade security controls.

Key Features

- ✂ **No-Code Integration:** Connect to 40+ supported platforms without developer involvement or manual scripting.
- ✂ **Workflow Automation:** Trigger routing, notifications, and storage events based on document actions.
- ✂ **Real-Time Syncing:** Keep your document data aligned across HR, storage, finance, and productivity tools.
- ✂ **Centralized Visibility:** Track document status and history across systems from one unified interface.
- ✂ **Scalable Architecture:** Built to support high-volume enterprise document operations securely and reliably.

Popular Connector Categories

Common Use Cases

Pre-Fill Agreements with HR Data

Pull candidate or employee details from systems like BambooHR, Gusto, or HiBob to auto-fill offer letters, onboarding packets, or policy forms in Foxit eSign.

Store Finalized Contracts in Cloud Drives

Save signed agreements directly into organized folders in SharePoint, Google Drive, or Box to support compliance, access, and retention policies.

Accelerate Onboarding & Offboarding

Trigger document workflows for new hire onboarding or employee exits, ensuring forms are sent for signature and securely returned to platforms like TriNet or Paylocity.

Maintain Audit-Ready Compliance Records

Distribute policy acknowledgments and consent forms for eSignature, then sync signed copies into your connected system to maintain full visibility and audit trails.

Security & Compliance

Foxit Connectors are built for regulated industries where document handling, identity, and retention matter.

- ✂ **SOC 2 Type II certified infrastructure**
- ✂ **HIPAA-ready architecture**
- ✂ **TLS 1.2+ in transit / AES-256 at rest**
- ✂ **Role-Based Access Control (RBAC)**
- ✂ **SSO (SAML), MFA, and granular user permissions**
- ✂ **Full audit logs and traceable document activity**

All document data is handled securely, whether routed through cloud storage, CRM, or HR systems.

Key Benefits

- ✂ Reduce time-to-sign by automating multi-step workflows
- ✂ Eliminate manual uploads, downloads, and follow-ups
- ✂ Cut IT reliance with admin-configurable, codeless setups
- ✂ Improve compliance posture with end-to-end document control
- ✂ Streamline operations without disrupting your current stack
